

Smart Animals

About the project

It is a writing project based on a collaborative fable. We will create our animal characters and bring them together in a story. We will write adventures of our created animals and also learn our values especially on caring animals and protecting our planet. We will also do creative activities related to ART.

Expected Results

With this project students will:

- Develop their creativity while writing the story
- Develop their writing and artistic skills
- develop their ICT skills and web 2 tools
- practice their use of language skills
- develop a European citizenship spirit

At the end of the project, we'll form a collaborative story and comic e- book, collaborative poster, a dictionary, blog and exhibition.

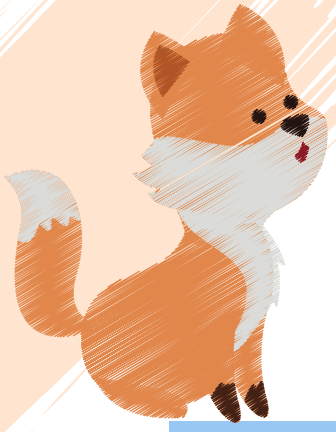

Aims

With this Project our aim is to

- To make students' use their creativity and imagination
- To raise students' motivation, creativity, writing and artistic skills
- To improve students' and teachers' use of ICT skills and web 2 tools
- To develop students English language skills
- To teach values -caring animals and environmental issues
- To develop a European citizenship spirit.
- To experience and familiarize with Other country/culture and traditions
