

ALL ABOUT DIGITAL

ABOUT THE PROJECT

We are in a digital age. But there is one thing we should be aware of. During the pandemic situation children from all ages started to use technology more often. We are on online education and it seems online teaching methods will stay being a part of us in face to face education too. It is a necessity for our pupils to know about the risks of internet and to grow as digital citizens. In this project students will take a step into rules of internet and we will guide them to realize all about digital.

AIMS

*Learning about technologic products and digital technologies
Learning esafety rules
Behaving respectfully and responsibly on the internet
Improving ICT skills with the use of web 2.0 tools
Improving researching skills
Enrichment of the communication experience in foreign language
Developing collaborative skills*

EXPECTED RESULTS

Students will learn technologic products.

Students will learn eSafety rules and be aware of their safety when they are online.

Realize the effects of overuse of technology on health.

Develop respectful and careful behaviors to their peers when online.

Improve collaborative learning skills.

Improve ICT skills and foreign languages.
