

eTwinventors are on the stage

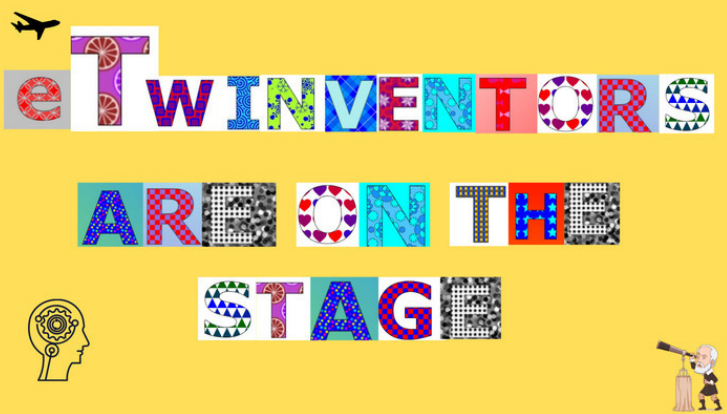

About the project

It is a Project about famous inventors and inventions. First etwinventors will search for past inventors and inventions and then by using creativity and imagination will try to think of inventions considering future problems. During the Project eTwinventors will do analytical and critical thinking and problem solving activities.

Aims

- By this project our aims are;
- to learn about famous inventors/discoverers
 - to make a travel into past and learn about life changing inventions/discoveries
 - to improve pupils language skills
 - to learn different country and cultures, make new friends
 - to make pupils use their imagination and creativity, problem solving ability
 - to do creative thinking, analytical thinking
 - to improve pupils' social skills
 - to improve pupils and teachers ICT skills and usage of web 2 tools

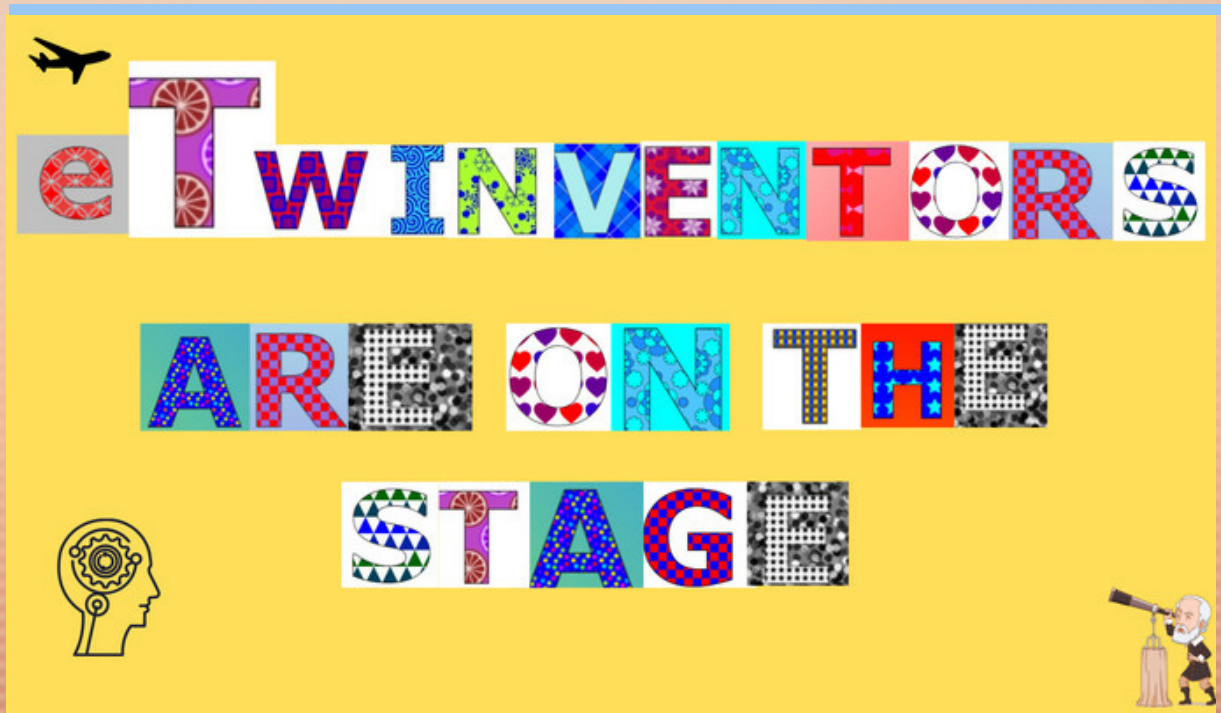

Expected Results

By this project;
Pupils will make a travel into past and learn about life changing inventions/discoveries
Pupils will improve their language, social and ICT skills and usage of web 2 tools
Pupils will meet different country and cultures.
Pupils will use their imagination and creativity and write a collaborative story and think of new inventions
At the end of the project,
We will bring our stories together and form our e-book. We will also form an e- magazine and make an exhibitio
